Expected Outcome

The primary objectives of the industrial visit to Yakult Danone India Pvt Ltd was to provide the students with practical exposure to the industrial environment and enhance their understanding of the theoretical concepts learned in the classroom.

Purpose of the event

- To help the students understand the challenges faced by an industrial unit and how they are addressed.
- To enable the students to interact with the professionals working in the industry and gain insights into the practical aspects of the business.

Detailed Report:

An Industrial visit to Yakult Danone India Pvt. Ltd was held on 4th August 2021. Mr. Aadish, Executive, P R Department took the students to industrial tour. Yakult is the world's leading probiotic beverage created in Japan in 1935. Today, Yakult is sold in 39 countries and regions around the world. The company's portfolio included a range of consumer, cosmetic and pharmaceutical products.

Mr. Aadish briefed that Science and research are the basis of their business. He told that Yakult have institutes in both Japan and Europe that are committed to discover the endless applications for probiotics as well as the use of intestinal bacteria in human health globally. In this industrial trip students were shown about manufacturing of probiotics. The automated blow, fill and seal technology was shown. Students witnessed then the stringent aseptic conditions of the company and learnt about various manufacturing operations.

Learning Outcomes:

The industrial visit to Yakult Danone India Pvt. Ltd provided the students with several learning outcomes, including:

- **Practical Exposure:** The visit enabled the students to gain practical exposure to the industrial environment and understand the functioning of an industrial unit.
- **Understanding of Processes:** The students were able to observe the various processes involved in the manufacturing of construction and specialty chemicals and gained insights into the challenges faced by the industry.
- **Interpersonal Skills:** The visit provided an opportunity for the students to interact with the professionals working in the plant and enhance their interpersonal skills.
- **Career Opportunities:** The students were able to explore the career opportunities available in the industry and gain insights into the skills required to succeed in the industry.
