Industrial Visit- Manitou Group

Event Report

Event Name: Industrial Visit to Manitou Group	Event Date: 28 th Jul 2022
Faculty Coordinators: Dr. Ruchi Garg and Dr. Imad Ali	Event Timings: 10:00 AM onwards
Number of Participants: 110	Venue: 27, Ecotech-II, Udyog Vihar, Greater Noida, Uttar Pradesh

Expected Outcome

- To enhance student's practical exposure and to let them have an overview of the activities related to "Quality and Process Control" & "Customer Relationship Management carried out by Manitou.
- To give the students a hands-on understanding of the operations and procedures used in industry.

Purpose of the event:-

- Students will understand the administration of a large manufacturing company's supply chain and production.
- To give students a forum for interaction with business executives so they can learn from their experiences.

Detailed Report:-

An overview of the business and its activities preceded the industrial tour to Manitou. Manitou is a French multinational firm that specializes in the development and marketing of handling equipment, including as forklifts, aerial work platforms, and telehandlers. The company employs approximately 4,000 employees worldwide and has a presence in more than 140 countries.

The students were given a tour of the manufacturing plant during their visit, allowing them to see the production process in action. The tour included all production phases, from acquiring raw materials to shipping finished goods. The students had the opportunity to see the many tools and machinery used in manufacturing as well as how technology has improved productivity and quality.

Following the tour, a presentation on the company's supply chain management was presented to the students. The talk covered the various phases of the supply chain, including distribution, logistics, production planning, and purchasing. The significance of a successfully managed supply chain for a manufacturing organization was made clear to the pupils. The students also had the chance to speak with experts from various business divisions, including marketing, supply chain, and production. The professionals talked about their experiences and industry insights, and the students were able to learn a lot from them.

Learning Outcomes:-

- Students learned about the management of a manufacturing company's supply chain and the significance of a well-managed supply network.
- Students learned about the numerous duties performed by the company's various departments and how they cooperate to accomplish the organisational goals.
- Students connect with professionals in the field to gain insight into their experiences.

- Connect with professionals in the field to gain insight into their experiences.
