**Detailed Report:**

The session was organized by the GREY MATTER (the Business Analytics) Club and Entrepreneurship Club at Lloyd Business School Greater Noida, Uttar Pradesh, under the series of Magdharshan 3.0. The session was held on 2020 January 7th and was conducted by Mr Dinesh Negi, an alumnus of PGDM-Business Analytics LBS and a Senior Analyst in the healthcare sector. The session was conducted from 1:00 PM onwards. The session started with an introduction of Mr Negi and gave examples of how he started his career and the crucial steps one should remember as a student to learn as much as possible. Furthermore, sir explained the

importance of data analytics in today's business world. He explained the basic data analytics concepts, such as data visualization, data mining, and predictive modeling. The participants actively participated in the session and asked relevant questions about the transition from the non-technical to the technical field. Mr. Negi patiently answered all the questions and provided practical examples for better understanding.

### **Major topics covered by the speaker:**

The speaker, Mr. Dinesh Negi, an alumnus of PGDM-Business Analytics and a Senior Analyst in the healthcare sector, covered many topics during the session. He started the session by introducing the basics of data analytics and the significance of data analytics in today's business world. He then talked about how management students can incorporate the following insights:

- **Case-based learning:** Case-based learning is an effective teaching method in management education. It enables students to learn from real-life examples and develop analytical and problem-solving skills.
- **Internship programs:** Internship programs provide students with hands-on experience in the industry. It helps them apply their classroom learning in practical settings and understand the industry's nuances.
- **Soft skill development:** Soft skills such as communication, teamwork, and leadership are critical for success in the industry. Management institutions need to focus on developing these skills in students.

### **Learning Outcomes:**

- The session successfully achieved its objectives. The participants learned about the importance of data analytics in various industries and how it can be used to make data-driven decisions.
- The session helped the participants enhance their knowledge and skills related to data analytics, which can be helpful in their future careers.
